

Fastest Payback Guaranty

We guaranty that Capitol Inner Windows using ClimateSeal™ will have THE FASTEST ENERGY SAVINGS PAYBACK of any similar installed window improvement or installed replacement system currently available for purchase in the marketplace. In other words, the money we save you in energy each year divided by the total project cost will be the Payback in years. We guaranty that we will pay you back in savings FASTER than any similar window product or system.

Capitol Inner Window is confident of our payback claims because we employed independent Energy Auditors and Independent Testing Laboratories to generate real world test data that is used to calculate energy savings not manufacturer's claims.

Show us a written estimate of an installed product and payback analysis for that installed product that is backed by Independent Testing Laboratory data NOT MANUFACTURERS claims, and we will reduce our price to match their payback PLUS give you an extra 15% bonus.

The payback analysis is determined by the cost of the project divided the calculated annual energy savings using the same standard industry formulas backed by test data supplied by an Independent Testing Laboratory. The pricing must include installation by a contractor licensed to perform home improvement and who is EPA certified to deal with lead paint.
